SCHNEIDER

CLT – CEILING XL
Large format
Visual quality | varnished

Local spruce
Visual quality

Local spruce
KNOT-FREE/RIFT

LARGE FORMAT. VISIBLE.

Visible cross laminated timber for solid ceiling structures | Width up to 3.00 m and length up to 16.00 m

- **Local spruce:** We produce the greenware for the large-format CLT in our **own sawmill**.
- **Narrow side bonding:** High-quality and statically load-bearing side bonding for closed joints on the visible side.
- **Exact profiling and chamfer:** Millimetre-accurate profiling of the element joints with our planing machine.
- **Ready for laying immediately:** Elements do not require turning on the construction site – the visible side is on the bottom upon delivery.

Local spruce **KNOT-FREE/RIFT**

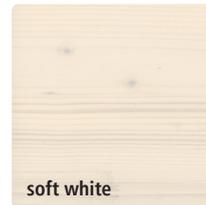

Varnish UV protect

COL. FINISHED.

UV protect

soft white

alpine white

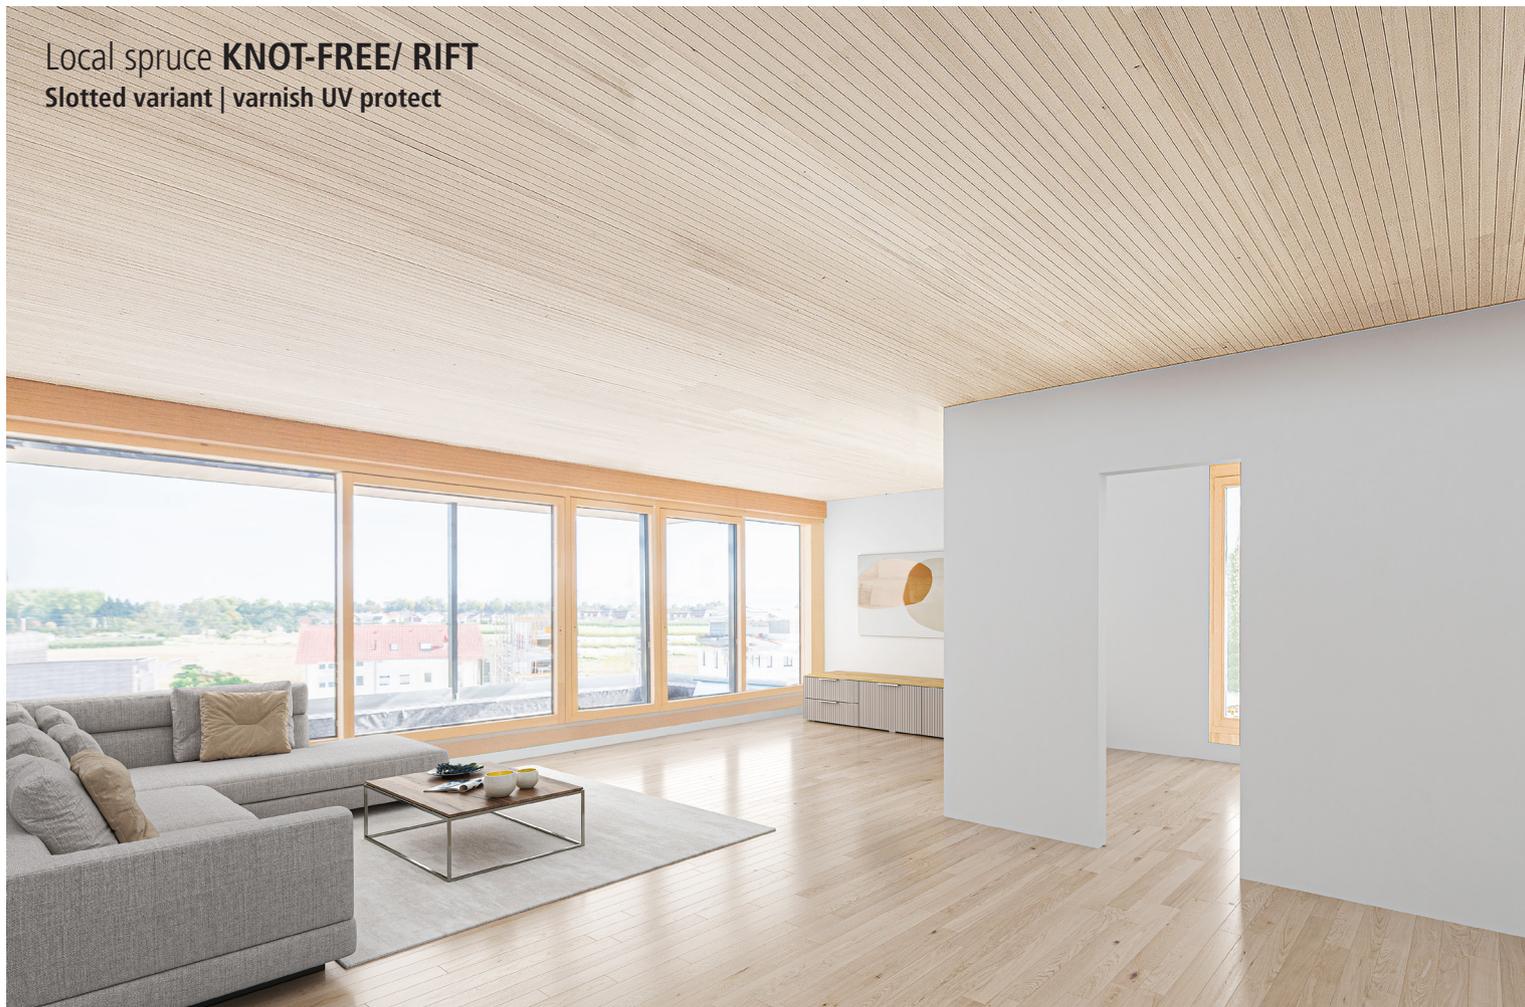

light grey

Varnish and UV protection up to 2.50 m

- Elements coated with best wood **TIMBERCOLOR**, with UV protect, soft white, alpine white or light grey
- The colours impress with their **appealing look** and **longevity**
- All varnishes retain the **diffusion-open characteristics** of the wood, for a good room and living climate

Local spruce **KNOT-FREE/ RIFT**
Slotted variant | varnish UV protect
